

## 4<sup>th</sup> GRADE READING SCORES

### Spring 2000 Stanford-9 4<sup>th</sup> Grade Reading Scores by District

Each bar in the chart below represents the full range of National Percentile Rank (NPR) Stanford-9 scores for Orange County School Districts, with the low NPR score on the left side and the high NPR score to the right. The point at which the bar changes color represents the mean Stanford-9 NPR score for that district. For example, Anaheim City Elementary School District's NPR scores range from a low of 16 to a high of 68 with a mean NPR of 31.

On the Stanford-9 assessment test having an average score of 50 is expected.  
The test is designed that 50% will score above and 50% below the mean.
